

# 46" x 24" Divided Pigeon Trap

The SW4624SWF is a divided trap with 6 one-way doors, a hinged shade screen and the Food & Water Station. This is a divided trap with 2 spring and latch fastened top access doors for easy removal of birds from either side. Holds up to 30 birds at one time. Easy access to the food and water station from either side. Made from heavy duty 14 gage wire.

**Item# SW4624SWF - Divided pigeon trap w/shade screen, food & water station**

Pre-bait the problem area for several days. Once birds are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the doors so birds can move freely in and out of the trap as they eat. Apply bait in a trail that starts outside of the trap, leads in through the doors and ends with the bulk of the bait in the middle of the trap.

After acclimating to the trap, untie the doors and capture the pigeons. Make sure to inspect the trap every day. Remove the pigeons by using either of the 2 top mounted access doors (under the shade screen). Use these doors to access the water and food containers.

Make sure the birds have food and water. Do not leave pigeons in the trap for long periods of time.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
