

# Universal Burrowing Animal Trap

Use for the live capture of burrowing animals such as woodchucks, possum, skunks or as a standard box style live trap for raccoons, cats, small dogs, etc. Sliding doors at both ends allow you to set the trap as needed. For standard trapping, open the front sliding door, set and bait the trap. For burrowing animals, place the open floor area over the burrow and close the front sliding door so the animal enters the holding area, triggering the trap door. This 36" x 11" x 12" is fully assembled and is ready to use right out of the box.

## Item# VCS53000 - Universal Burrowing Animal Trap

36"L x 11"W x 12"H

Proper bait, trap location and knowing your target animal are important. **For trap instructions and tips refer to the instruction booklet sent with the trap.**

Do not handle the trap with your bare hands, this can leave a scent that animals can detect. The trap should be on a level surface so it does not tip or rock back and forth with movement. When using to capture burrowing animals, it may be necessary to anchor the trap to the surface or ground over the burrow or

structural hole. Place the bait at the very back of the trap in a small container or tray. This will help ensure that the animal steps on the trip pan, triggering the trap door behind them.

Check the trap frequently. Do not leave animals in traps for extended periods of time. To release the animal, stand in front of the trap and raise the rear door. Always use caution when releasing trapped animals, they may be aggressive.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
