

Multi-Catch Live Squirrel Trap

Designed to capture unwanted rodents/animals and allow for their removal or relocation. Ideal for low clearance areas such as attics and crawlspaces. Can catch multiple squirrels and similar sized animals without having to reset the trap. Quickly release non-target animals. Easy to bait and retrieve target animals. Heavy 14, 16, Ga. galvanized welded wire. Easily to clean and maintain. Trap measures 24"W x 24"L x 4"H. Holds 6 to 8 squirrels at one time.

Item# SW2424 - Multi-Catch Squirrel Trap

Pre-bait the problem area for several days without the trap. Once squirrels eat the bait and are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the one way doors so squirrels can move freely in and out of the trap as they eat. Place the bait along the side of the trap away from the doors so the squirrels must fully enter the trap.

After acclimating to the trap, untie the doors and capture the squirrels. Make sure to inspect the trap every day. Remove the squirrels and similarly sized animals through the top access door.

Use caution when removing the trapped animal. They are likely under stress and can bite and scratch when handled.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
