

35"x 16" Economy Pigeon Trap

This trap has one central one-way door and can hold up to 10 birds at one time. Built from 14 ga. galvanized wire with a 1" x 2" mesh this pigeon trap is designed to be economical, durable and easily placeable. A spring and latch fastened top mounted door allows for quick bird removal. This single compartment trap comes fully assembled and ready to use. To trap large flocks of pigeons, place multiple traps end-to-end. Optional shade cover available (item# SWS3516).

Item# SW3516ES - Repeating Pigeon Trap

35"L x 16"W x 10"H
14 gage wire mesh

Optional Shade
Cover (#SWS3516)

Pre-bait the problem area for several days. Once birds are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the one way door so birds can move freely in and out of the trap as they eat. Apply bait in a trail that starts outside of the trap, leads in through the doors and ends with the bulk of the bait in the middle of the trap.

After acclimating to the trap, untie the door and capture the pigeons. Make sure to inspect the trap every day. Remove the pigeons by using the top access door.

Provide food and water in the trap. Partially cover the trap to create shelter from the elements. Do not leave birds in the trap for long periods of time.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
