

Live Capture Snap Traps for Birds

While they resemble the familiar rodent trap designs, the SWST17 and SWST24 Live Capture Snap Traps for Birds are designed for the live capture of unwanted pest birds. Nixalite offers the 17" square and 24" square size traps. Made from green powder coated steel frames and all weather green netting to blend into natural surroundings.

Item# SWST17 - 17" x 17" x 2.5"

Item# SWST24 - 24" x 24" x 2.5"

Live Capture Snap Traps for pest birds can be placed on nearly any flat surface, horizontal or vertical. Place them on ledges, AC units, walls, roofs or simply on the ground. Anywhere birds are a problem. If needed, fasten the trap with ground stakes or simple ties.

Pre-bait the problem area for several days. Once birds are present, set the trap. Apply bait in and around the bait pan so the birds walk into the trap. Once triggered, the spring loaded, nylon netting closes over the birds to trap them quickly and securely.

Use the 17" trap for starling sized birds. Use the 24" trap for pigeons, grackles and crow sized birds.

Remove birds immediately. DO NOT leave birds in traps for long periods of time. Do not leave the traps unattended for long periods of time. We suggest using a SW2412 Pigeon Trap or SW3516SWF Pigeon Trap for transporting the birds to the release point.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
