

Deer Off

Deer, Rabbit & Squirrel Repellent

An all-natural, ready to use repellent that safely, effectively and humanely repels deer, rabbits and squirrels that feed on bulbs, flowers, grass, plant bulbs, seedlings, trees and other types of landscaping.

How It Works:

Deer Off is an odor and taste repellent made from putrescent egg extract, garlic and capsaicin extracts. Putrescent egg emits the smell of an animal protein that repels herbivores (plant eaters). The garlic and capsaicin affect the smell and taste senses of rabbits and squirrels, deterring them from eating treated plants.

Surfaces:

Apply Deer Off to plant bulbs, flowers, ornamentals, grasses, seedlings and trees. Because there are so many different plant species, we recommend testing a small area on each type of plant before widespread use.

Application:

Spray all surfaces until run off occurs. Repeat as necessary. Spray branches, stems and leaves thoroughly from all sides until run off occurs or until leaves appear wet. DO NOT apply when temperature is less than 42° F. or in windy or wet conditions. Reapply as new growth appears. Registered in California as a deer repellent only.

Efficacy:

One treatment should protect plants for six to eight weeks. Treat at the beginning of each new season and as new growth appears. Re-application may be needed after heavy rains.

Coverage:

The 32 oz. RTU spray bottle will treat 45-50 Shrubs 4 feet high or about 500 square feet. The gallon RTU jug will treat 180-200 shrubs 4 feet high or about 2,000 square feet.

- Repels deer, elk, rabbits & squirrels
- Protect lawns, trees and landscaping
- Double protection - odor and taste repellent
- One treatment can last up to 8 weeks
- Economical solution to a costly & frustrating problem
- Biodegradable - all natural ingredients
- Safe for people, pets, plants and the animals it repels.
- Ready to use (RTU) - no mixing required
- Easy to apply repellent in quart spray bottle or gallon jug with sprayer

Note: ALWAYS read product label before application!!
