- Car & Truck Hoods
- Garbage Cans

### Protect Pets From:

- Dangerous materials (i.e. anti-freeze, insecticides, etc.).
- Poisonous plants.
- Machinery & Tools.
- Any area or location that can harm your pet.

# Mini ScareCrow

## motion activated pet deterrent

Safely and humanely keeps your pets from causing harm or getting hurt. When your pet gets too close, the motion sensor first sets off a warning tone followed by a short burst of compressed air.

### How It Works

Designed for indoor use, the Mini Scarecrow quietly waits until it detects an approaching pet. It then sounds a warning tone followed by a sudden burst of compressed air. The sound/air combination teaches your pet to stay out of the area.

### Humane Control

The Mini Scarecrow is completely harmless. Your pet will be startled but not harmed by the warning tone and compressed air. It is a non-toxic, non-hazardous method of behavior modification for your pets (or strays). The Mini Scarecrow teaches pets what they should stay away from and where they shouldn't go.

### Automatic & Adjustable

The motion sensor and spray heads are separately adjustable so they can be positioned precisely. The sensor (located in the spray head) has a maximum detection range of 24 inches and can see in a 70° wide arc. The spray pattern is also adjustable with 3 vertical air-spray positions to choose from.

### Economical

Once your pet learns to recognize the warning tone, you can switch to the 'sound only' setting to conserve compressed air. Each can of compressed air (Mini Scarecrow brand) holds enough air for 500 sprays. The 4 AAA batteries (not included) can power the Mini Scarecrow for months.

### Mini Scarecrow Prices & Instructions

Refer to the ABC/Nixalite Bird & Animal Control Catalog for current prices. Each Mini Scarecrow comes with complete application instructions. For more info, contact ABC/Nixalite.
