

Rat-A-Way

Rat & Mice Repellent

The world's only patented and EPA registered granular rodent repellent!

Rat-A-Way Rat & Mice Repellent provides an effective perimeter deterrent that is proven to prevent rodents from entering structures and garbage storage areas. Approved for outdoor use, Rat-A-Way eliminates the problems associated with conventional rodent control. If rats and mice can't get in, you can eliminate deadly poisons, gruesome snap traps, messy glue boards and the decay of dead rodents.

University tested:

University testing shows that Rat-A-Way is effective in reducing the numbers of rodents invading treated buildings and garbage areas. While it does not totally prevent rodents from entering treated areas, it reduces rodent activity in these areas by 72-90%, significantly reducing rodent damage. Keep away from children and pets.

Efficacy:

Rat-A-Way is tested and proven effective against the house mouse, the black rat and the Norway rat. It can be used around homes, schools, warehouses, apartment buildings and garbage areas. Rat-A-Way is an environmentally responsible choice for residential and commercial use.

Application:

Starting 12 inches or less from the area to be protected, apply a light 24 inch perimeter band around the structure or garbage storage area. Apply at a rate of 1 pound for every 30 feet of band. Reapply when the odor of Rat-A-Way becomes faint or after heavy washing rains. Do not apply in gardens or in food/ feed bearing crops. Keep away from streams, ponds, lakes, pools and water supplies.

Increase the effectiveness of your rodent control program:

- Add Nixalite's **CopperBlocker** access control to seal up small gaps & openings.
- For indoor rodent control use the **Rat Zapper** battery operated rodent kill trap.

For more information on these additional products, contact ABC/Nixalite.

Note: ALWAYS read all product information and the product label before application!!
