ROP-EL®

All Natural, Outdoor Dog, Cat and Bird Repellent Granules

Stop nuisance animals from defecating, urinating and digging in gardens, lawns, flower pots and landscaping. Safe and easy to apply.

Ropel Outdoor Dog, Cat and Bird Repellent is an easy to apply, ready to use, area repellent. When used as directed, these repellent granules deter dogs, cats and birds from defecating or urinating on your property. It also discourages digging in lawns, gardens and flower pots.

These dry granules provide an aromatic barrier against dogs, cats and birds. Although not offensive to humans, the granules are repulsive smelling to these animals, encouraging them to leave the area quickly, without harming them in any way.

Instructions for use:

Apply granules directly on lawns and garden beds, approximately 1 foot away from flowering plants and painted surfaces. Do not apply to dichondra or unusual ground cover plants without testing small areas first.

To prevent defecation and urination by dogs..

on lawns or around hedges, trees, shrubs or vines; remove old fecal material and sprinkle Ropel evenly on the affected area, using 1 pound of granules for every 110 square feet.

To prevent cats from digging..

in lawns, flower and vegetable gardens and under bushes, fill existing holes and apply evenly on the affected area, using 1 pound of granules for every 55 square feet.

To prevent defecation by birds..

on lawns, golf courses and in planted park areas, sprinkle evenly, using 1 pound of granules for every 144 square feet.

Reapply weekly or until the problem stops.

Resume treatment if problem recurs. Ropel granules (aromatic repellent) can be combined with Ropel liquid repellent (taste repellent) for complete nuisance animal control on almost any type of property.
