Nixalite®

Established in 1949, Nixalite company pioneered the bird control industry. Our invention of the stainless steel needle strip in the 1940s resulted in the first commercial bird barrier available. **All strips and spikes on the market today are copied after our original "Porcupine Wire"**. Nixalite Premium Bird Spikes are often copied but never duplicated or surpassed.

Premium Points

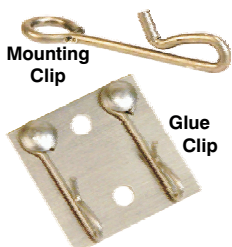

- Effective
- Inconspicuous
- Long Lasting
- Versatile
- Humane
- UV & fire proof
- Architecturally Correct

ColorCoat®

Color powder coating is available for all Nixalite Premium and E-Spike models. 8 standard colors: black, white, grey, tan, brown, bronze, green and red. Custom colors available.

Soft Tip Option

Changes pointed wires to flat tip wires on Premium Nixalite (S & H) and all E-Spike models. Specify for less demanding bird installations and/or where frequent human contact is likely. All other installations use pointed wire designs.

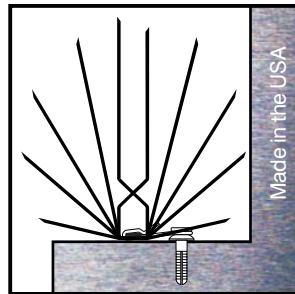

Stainless steel mounting clips and glue clips are designed by ABC Nixalite to allow for easy strip removal and reinstallation.

Most Effective Bird Spike

Premium Nixalite Bird Spikes are the only choice for real control. 100% stainless steel construction offers greater effectiveness and durability than any other bird spike. Other spikes claim to be all stainless, but in reality are hybrids that contain plastic components. 100% stainless steel is more flexible, stronger and lasts longer than any plastic. Plain and simple, Premium Nixalite is the best, most effective bird control barrier used for all birds, large and small.

Premium Nixalite® Models

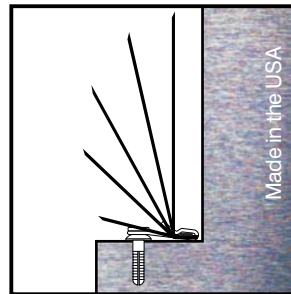

Premium Nixalite Bird Spike models are all stainless steel, available in 2 and 4 foot strip lengths with a 1/4" wide, flexible base strip. Standard mounting hardware included. Available in ColorCoat.

Nixalite Model S

Full row model for large and small birds, including pigeons, seagulls, starlings, sparrows, etc. Use with Model W for climbing animal barriers and mud swallow control.

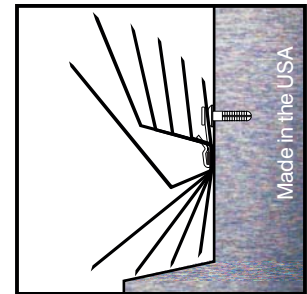

- 4" Wide, 4" High
- 2 and 4 ft. lengths
- 120 points / foot
- 180° wire coverage
- Pointed or Soft Tip
- ColorCoat colors

Nixalite Model H

Half row model for narrow surfaces less than 2" in depth and in conjunction with Nixalite Model S on wider surfaces to achieve the proper surface coverage.

- 2" Wide, 4" High
- 2 and 4 ft. lengths
- 60 points / foot
- 90° wire coverage
- Pointed or Soft Tip
- ColorCoat colors

Nixalite Model W

Wall mount model for vertical surfaces. Use over surfaces less than 2" in depth or over other Nixalite models. Use with Model S for climbing animal barriers and mud swallow control.

- 3" Wide, 5-1/2" High
- 2 and 4 ft. lengths
- 120 points / foot
- 180° wire coverage
- Pointed tip only
- ColorCoat colors

ABC Nixalite[®] Bird Netting

Three types of bird netting and all the netting hardware and accessories needed.

K-Net HT Bird Netting: Highest quality bird netting available. Manufactured and tested in compliance with ISO 9001 2000 Quality Management Standards.

Strongest: 12 ply polyethylene strands with a 75 lb. knotted breaking strength (k.b.s.). 3/4" mesh keeps out most birds. UV, flame, rot and abrasion resistant. Ideal long term outdoor applications. 10 year warranty.

PollyNet Bird Netting: Economical, durable and easy to install. Available in 2 grades; Premium and Lightweight.

Effective: With mesh sizes no larger than 3/4", PollyNet keeps out birds of all sizes. The seamless and knotless mesh exhibits little to no sag after installation

Durable: Made from extruded UV resistant polypropylene.

Go to www.nixalite.com and click on [Architect's Info Center](#) to View, Print or Download 3-part specifications for Nixalite's Bird Netting.

E-Spike: Lowest Cost All Stainless Bird Spikes

- 100% stainless steel strip and wire bird spike.
- 2 E-Spike Models available in Soft Tip and ColorCoat.
- Hardware available.
- For pigeons & seagulls.

Pigeon Spikes: Lowest Cost Bird Spikes

- PS Composite: stainless wires, polycarbonate base.
- PS Plastic: all UV stabilized polycarbonate bird spike.
- Hardware available.
- For pigeons & seagulls.

FliteLine: Discreet Post & Wire Bird Deterrent

- All stainless posts & wire.
- Very discreet deterrent for pigeons & seagulls.
- Easy to assemble & install.
- Ideal for ledges, hand rails, parapets, etc

K-Net HT: The Strongest Bird Netting Available

- 75 lb per strand K.B.S.
- Seamless polyethylene net with uniform 3/4" sq. mesh.
- 25 and 50 ft widths
- 25, 50 and 100 ft lengths

PollyNet: Economical and Durable Bird Netting

- Available in Premium and Lightweight netting grades
- Seamless, extruded polypropylene netting
- 14 and 17 ft widths
- 10, 50, 100 & 250 ft lengths

Chicago Cultural Center, Chicago, IL

Premium Nixalite installed in 1993

Messy birds are not a problem for the Cultural Center since the Nixalite bird spikes were installed.

According to a **Department of Cultural Affairs** spokesperson "They're still doing the job after 13 years". "We have pigeons on the sidewalks at times, but the Nixalite bird spike strips keep the birds off the many ledges and friezes where they were installed".

When Chicago architects **Holabird & Root** were commissioned to convert the 1892 library into a modern cultural center, they faced a serious bird problem. Toxic and corrosive bird waste covered every ledge.

After an intensive surface cleaning and sanitizing, the architect chose the

Premium Nixalite Bird Spikes to protect the many

ledges and cornices".

Nixalite was selected not only because

of its proven effectiveness, but also because of its durability and aesthetic quality". "The thin stainless steel wires are invisible at the distances this landmark building is normally viewed".

Welded Wire Mesh Barriers

Stainless steel and galvanized welded wire mesh for the strongest exclusion barriers.

Stainless Steel: 1/2" square, 0.047 (18 ga.) welded wire mesh.

Galvanized: 1/2" square, 0.041 (19 ga.) welded wire mesh.

Applications: Long lasting exclusion for all birds, nuisance animals and larger rodents. Also used for security applications. Limitless applications, install with common hardware.

Roll Sizes: All rolls are 4ft wide and 100ft long.

Surface Cleaners & Sanitizers

Protects personnel from hazardous waste and prepares the surface for installation.

Application: Use to safely neutralize bird & animal waste, prepare the installation surface and protect personnel. Nixalite offers 7 products to cover the widest variety of cleaning, sanitizing and deodorizing applications.

2 Wide-spectrum bactericides for surface sanitizing.

2 All natural cleaners & sanitizers with activated enzymes.

3 Types of anti-bacterial personal protection products.

Wildlife Control Systems

Bird and animal barriers, repellents and dispersants to protect facilities and grounds.

Deer Blocker Deer Fence: A complete deer fencing system.

Access Control: Blocking products to keep pests out.

Fogging System: Bird fogging repellents and foggers.

Repellents: Non-toxic repellents for birds, bats, snakes, moles, deer, rodents, insects, etc. Safe, humane, reliable.

Goose Control: Repellents & dispersants for geese.

www.nixalite.com

Provides more useful architectural information than any other bird control website.

Architect's Info Center: Section dedicated to architects, engineers and facility owners. Includes 3-part specs, cut sheets, product instructions and lit.

Automated Estimate Worksheet: With little input, this automated page provides Premium Nixalite Strip totals per surface and an installation drawing.

Planning & Evaluation Services: Details our unequalled services and planning capabilities.
