Nixalite Bird Netting Protects Electrical Equipment, Stops Bird & Animal Outages

K-Net HT Bird Netting installation
Installed by Nuisance Wildlife Control
Spencerville, Ontario, Canada

Helping Protect Birds and the Power Grid

The Problem: Next to tree limbs, birds and animals cause the highest number of electrical outages. This number may be higher as experts suspect bird and animals as the cause of unexplained outages.

Did you know..

Utility scientists estimate more than 1,000 hawks, eagles, falcons and owls are killed by electrical equipment each year.

Using the right control products can keep these beautiful birds away from dangerous equipment.

Solution: Careful planning and research can lead to effective and long lasting bird and animal control. Installing a bird spike, bird netting or even a fogging system can help reduce bird caused damage and outages.
