

There's a *killer* loose in your garden...

and its name is 'FLUFFY'?

Keep 'Fluffy' out of the garden with CatStop™ Ultrasonic Cat Deterrent.

Are cats hunting in your garden or using it as a litter box? Stop 'bad kitty' behavior and protect your garden with CatStop™ Ultrasonic Cat Deterrent.

Designed for outdoor use, CatStop™ keeps cats out of your garden, potted plants and the kid's sandbox with a motion-activated burst of ultrasonic sound that humans cannot hear. This sudden and powerful burst of ultrasonic sound startles the cat and teaches it to stay away.

Place the CatStop with the sensor facing the area to be protected. The detection zone is an 80° wide cone extending 20 feet from the sensor. It also detects body heat, so it works night and day. Use the supplied Mounting Stake for quick positioning in soft ground or use the supplied mounting screws for fastening to horizontal surfaces. CatStop works up to 6 months on one 9 volt battery (not included with CatStop).

For more information refer to the instructions provided with the CatStop deterrent or go to the web page at www.nixalite.com/catstop.aspx.

CatStop™

- Provides a safe and effective outdoor deterrent for cats.
- Works night and day by sensing motion and body heat.
- Monitors up to 280 ft² (26 m²) with an 80° cone, extending 20 feet.
- Power with 9-volt battery (not included) or optional AC adapter.
- Easy to install, clean, humane, inconspicuous and automatic.
