

KILLS BEDBUGS II

Long lasting, water based formula that kills bedbugs dead - and keeps killing them for up to 16 weeks!

KILLS Bedbugs II is a **Ready-To-Use** water based Deltamethrin spray that quickly kills bedbugs and other listed insects on contact. For use indoors on tough re-emergent pest bedbug (*Cimex letularius*) problems.

KILLS Bedbugs II is designed to be a spot control and crack & crevice control for bedbugs and the other listed insects. It kills pests on contact and keeps killing them for up to 16 weeks. This residual keeps insects from coming back.

Not only does KILLS Bedbugs II kill bedbugs, but it is also labeled for use against fleas, ticks and spiders.

GENERAL APPLICATION: Spray from either the quart spray bottle or use a common pump-up sprayer. Do not spray up into the air. Use for spot treatment or crack & crevice treatment. Spray surfaces until slightly moist. Retreat surfaces as needed. **ALWAYS READ PRODUCT LABEL BEFORE USE.**

TO CONTROL BEDBUGS: Remove linens before spraying, wash before reuse. Lightly spray mattresses, especially tufts, folds, seams and edges. Apply to the interior of bedframe. Let dry before remaking the bed. Repeat treatment as needed.

TO CONTROL FLEAS & TICKS: Following general application guidelines, apply as spot and crack & crevice treatment where these pest live and crawl. **SEE PRODUCT LABEL FOR MORE DETAILS.**

SURFACE SPRAYING: To kill fleas, ticks and spiders on surfaces, spray as directed into the pest hiding places such as cracks and crevices, around and under shelves and drawers, storage etc. Always test cloth and fabrics before spraying them. **SEE PRODUCT LABEL FOR MORE DETAILS.**
