

# Professional Grade Rear Release Animal Trap

Heavy-duty trap designed for the live capture and easy release of raccoon sized animals including raccoons, groundhog, skunks, nutria and more. Designed and developed for wildlife control professionals, this trap incorporates several enhancements for increased safety, performance and durability. Built tough with heavy duty 14 gage GALFAN wire mesh, this trap measures 36" x 11" x 12". The Easy Release rear door makes animal release and baiting quick and easy. The fully assembled trap is ready to use right out of the box.

## Item# VCS54136 - HD Single Door Live Capture Animal Trap

Proper bait selection, trap location and knowing your target animal are important. For trap instructions and tips refer to the instruction booklet sent with the trap.

Make sure the trap will be on a level surface so it does not tip or rock back and forth with the movement of the animal. Place the bait at the rear of the trap in a small container or tray. DO NOT put bait on the trip pan - it must be placed at the back of the trap. This

will help ensure that the animal steps on the trip pan, triggering the trap door behind them.

You must check the trap frequently. Do not leave animals in traps for extended periods. To release the trapped animal pull up on the trap door at the front of the trap. Always use caution when releasing a trapped animal. They can be stressed and may be aggressive when released.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
