

IGEBA® CF-1 Car Fogger

Disinfect and deodorize vehicle interiors quickly with the IGEBA CF-1 Car Fogger.

Hangs over vehicle window with the nozzle inside and the controls outside. Foam pads protect vehicle finish.

Made of stainless steel and chemical resistant components. CF-1 is lightweight and durable.

IGEBA CF-1 in position

Engineered to be lightweight and easy handling, the IGEBA CF-1 fogger fits over a vehicle's window glass and positions the precision fogging nozzle inside the car with the operational controls outside the car. The fogger is then connected to a compressed air line with the integral quick connect air line fitting. The on/off switch starts the fogging and the dosage screw sets the desired solution flow rate. The precision nozzle and can produce both a dry and wet fog depending on the application.

Applications:

- Retail and commercial car, truck and SUV dealerships
- Rental and fleet service companies, taxi companies
- Auto service garages, auto detailing companies
- Disinfect and deodorize school buses and public transportation
- Disinfect ambulances, EMS vehicles, fire trucks and more

The CF-1 Car fogger runs on compressed air. It must have at least one BAR (15 psi) to a maximum of 6 BAR (88 psi). The supply line can have its own regulator as long as the pressure falls within the range provided. The CF-1 comes with a standard male air line fitting.
