

ELECTRIC FENCE NETTING

Portable Protection for Poultry, Pets, Gardens & More

Electric Fence Netting makes it easy to create a temporary enclosure to keep small animals in and predators out.

Use the Electric Fence Netting kit to make a 30 foot square enclosure. Add a solar powered line charger (purchased separately) and/or to an existing electric fence to protect pets, poultry and gardens from stray dogs and cats, raccoons, fox and skunks. Use to enclose and protect gardens, plants and other spaces from grazers like rabbits, deer, goats and more.

- Installed Electric Fence Netting kit is 120 feet long and 34 inches high
- Fence posts are pre-installed to the fence
- Quickly builds a 30 sq. ft. enclosure
- Fence is polywire with stainless steel conductors to carry the electric charge
- Vertical lines of fence are semi-rigid to help prevent sagging between posts
- Horizontal lines of fence get closer together at the bottom for extra protection
- Protect pets, gardens, plants, poultry and more from predators and grazers
- Keeps out predators like stray dogs and cats, fox, raccoon, skunks
- Expandable - combine additional Electric Fence Netting kits with the integrated stainless steel clips
- Simple lightweight design for easy set up in all types of locations
- When not in use, bundle the fence with the ties combined with the fence netting
- Up to 0.25 joule, 10 mile low impedance energizer for each fence (**not included**)
- **Made in the USA!!**
