

# Garden Safe **New Electric Fence Kit Protects Your Gardens**

**Easy to Install, Plug-In Power Electric Fence Kit**  
 All-in-one electric fence kit designed to safely and effectively protect gardens and areas that attract hungry animal pests.

**What's In The Kit:**

Each kit includes 1 - plug-in line charger, 10 garden posts, 210 feet of electric fence wire, 1 steel ground rod, 1 ground clamp and complete installation instructions. All of this is enough to install 100 feet of 2 wire fence, 66 feet of 3 wire fence or 50 feet of 4 wire fence.

**Applications:**

Safe and easy-to-install kit protects vegetable and flower gardens, seed beds, hobby ponds and other areas from rabbits, raccoons, ground hogs, skunks, dogs, cats, deer and other nuisance animals of similar size.

**How it Works:**

Powered by 110vac, the kit uses a mild but persuasive shock to teach nuisance animals to keep away from the Garden Safe kit. While the shock is convincing, it is safe for both humans and the animals. The shock from the fence is designed to modify an animals' behavior without injuring the animal.

**Expandable:**

Expand the kit for larger enclosures by simply adding more posts and wire. The included line charger can handle up to 500 feet of wire. Additional posts and wire are sold separately.

This brochure is not meant to replace the installation instructions for the Garden Safe Electric Fence Kit. If you have any questions regarding installation, contact Nixalite or refer to the instructions supplied with the kit.
