

PiGNX®

Bio-repellent for Birds

WHAT IS PiGNX?

An NSF approved, EPA registered repellent that deters pest birds from landing or roosting on structural surfaces such as ledges, window sills, beams, parapets and more.

Made from all natural products, PiGNX is an **eco-friendly bio-repellent** that is harmless to birds, animals and people. It can be used almost anywhere on all types of surfaces. It can also be used as a non-restrictive and safe baiting and repellent method for the dispersal of pest bird flocks. A safe and humane alternative to flock dispersal methods that utilize poisons.

WHAT MAKES IT DIFFERENT?

PiGNX® is not just a sticky paste. It is a **contact repellent** that uses capsaicin (what makes chili's hot) suspended in a clear gel made from food-grade mineral oil. When birds come into contact with the repellent, they get a heated reminder that they are not welcome here.

PiGNX® is used indoors and out. It is non-caustic, non-corrosive and will not harden, freeze, evaporate or run in high temperatures (tested up to 200°). It cleans up with soap and water and has no ill-effects if eaten by the birds.

IS IT SAFE?

YES. PiGNX® uses only food grade, all natural ingredients. It is harmless to birds, people and pets. It will not entangle or trap

birds. NSF approval means that PiGNX® can be used in on and around restaurants and food handling facilities.

HOW IS PiGNX APPLIED?

Apply PiGNX in beads with a caulking gun using the 10 ounce cartridges or from the bulk applicator guns that refill from the 5 gallon bulk pails.

Heavy infestation spacing

Refillable applicator gun

Apply beads in zigzag form on wider surfaces using the following guide:

Heavy infestation 3/4" wide zigzag bead with 3 to 4" gaps between peaks

Medium infestation 1/2" wide zigzag bead with 3 to 5" gaps between peaks

Light infestation 3/8" wide zigzag bead with 5 to 8" gaps between peaks

Each cartridge should yield 8 to 12 feet of bead depending on bead width. Each 5 gallon bulk pail equals about 64 cartridges or 500 to 750 feet of bead depending on bead width.

Always apply as directed.

Why PiGNX®?

- Highly effective, all natural bio-repellent for pest birds
- Eco-friendly - harmless to birds, animals and people
- Uses capsaicin suspended in a clear, food-grade mineral oil gel
- Effective for all types of birds
- Will not trap or entangle birds
- Used indoors and outdoors
- Will not harden, freeze, evaporate or run in high temps
- Cleans up with soap and water
- Environmentally responsible choice for bird control
- Available in 10oz cartridges and 5 gallon bulk pails
- Optional refillable applicator gun and follow plates available

ALWAYS read all product information and the product label before application!!
