

QD-64

One step germicidal cleaner & deodorant
Virucidal - Disinfectant - Deodorant - Pseudomonocidal
Salmonellacidal - Fungicidal - Bactericidal - Staphylocidal

Proven effective in killing:

Bacteria: Staphylococcus aureus (Staph), Staphylococcus aureus-Methicillin-Resistant (MRSA), Streptococcus pyogenes (Strep), Escherichia coli, Proteus vulgaris Salmonella enterica, Shigella flexneri

Virus: Adenovirus Type 3, Herpes simplex Type 1 (Herpes), HIV-1 (AIDS virus) Influenza A/Texas (Influenza), Rubella (German Measles), Vaccinia (Pox Virus)

Fungus: Aspergillus flavus, Aspergillus fumigatus, Aspergillus glaucus var. tonophilus, Candida albicans and Trichophyton mentagrophytes (Athlete's Foot).

Refer to the QD-64 Technical sheet for a comprehensive list of the pathogens QD-64 will destroy.

Applications:

Use to disinfect and deodorize any area or surface that interacts with a significant number of people on a day to day basis. This includes; bathrooms, kitchens, hospital rooms, medical offices, nursing homes, daycare centers, bars, cafeterias, restaurants, class-rooms, prisons, exercise facilities, hotels, motels, public restrooms, shower and bath areas, barber shops, campgrounds, playground equipment, airplanes, public transportation, emergency vehicles, mobile homes, cruise ships, taxis, trains, passenger terminals and more.

QD-64 is a multipurpose disinfectant concentrate that cleans, deodorizes and disinfects in one labor saving step. QD-64 contains synthetic detergents, emulsifiers, water softening agents, and two quaternary ammonium germicides that are EPA registered and USDA authorized when used as directed.

Features & Benefits -

- Concentrated - mix at 2 fl.oz. of QD-64 per gallon of water
- Kills a long list of Gram-negative and Gram-positive organisms
- Available in Lemon and Spring Fresh fragrances
- Kills MRSA (Methicillin-Resistant Staphylococcus aureus)
- Kills Pandemic 2009 H1N1 Influenza A Virus (Swine Flu)

General use directions - Remove and properly dispose of any heavy deposits from surface. For basic disinfection and deodorizing, wet the surface with a solution of 2 fl.oz. of QD-64 per gallon of water. Keep wetted for at least 10 minutes. Wipe dry or allow to air dry.

For typical use, the dilution rate is 1:64 or 2 fl.oz./gallon of water. For heavily contaminated surfaces, mix at a 4 to 6 fl.oz./gallon of water. Do not breathe spray. Wear P100 respirators or better when spraying or fogging. See the product labeling for more information.

Fogging: The QD-64 can be applied with cold fogging ULV sprayers to treat large areas quickly and efficiently. ULV equipment, like the **Sani-Tizer**, is specifically designed to apply anti-bacterial and mold abatement agents at a specific droplet size that targets the pathogen on a wide variety of surfaces. ULV foggers can treat large open spaces in only a matter of minutes making them ideal for treating public places.
