

NIXALITE'S

REDBIRD

FIRE RETARDANT BIRD NETTING

Nixalite's all new Redbird Fire Retardant Bird Netting is treated with a flame retardant additive and complies with NFPA 701 Standard Methods of Fire Tests for Flame Propagation of Textiles and Films 2015.

Nixalite's Fire Retardant Bird Netting uses a 3/4" knotted square mesh to keep out pest birds of all sizes. Made with high density polyethylene (HDPE) and treated with a flame retardant coating, each 6-ply strand (3x2) has 5 black fibers with 1 red fiber to give Redbird its unique reddish color.

Specifications:

Flame Retardant Netting

Meets NFPA 701 Standard Methods of Fire Tests

Seamless 3/4" (19 mm) knotted square mesh

6 ply strands; 5 black strands and 1 red strand

Net sizes: 25' x 25', 25' x 50', 50' x 100'

Meters: 7.62 x 7.62, 7.62 x 15.2, 15.2 x 30.4

UV, abrasion and rot resistant bird netting

Installs with all types of netting hardware

Applications:

Anywhere Fire Retardant Bird Netting must be used!

Aircraft Storage & Maintenance Hangars

Vehicle Maintenance & Storage Buildings

Gas Station & Convenience Mart Canopies

Industrial Workshops & Chemical Handling

Oil & Mining Containment Ponds

Sports Backstops & Stadium Netting

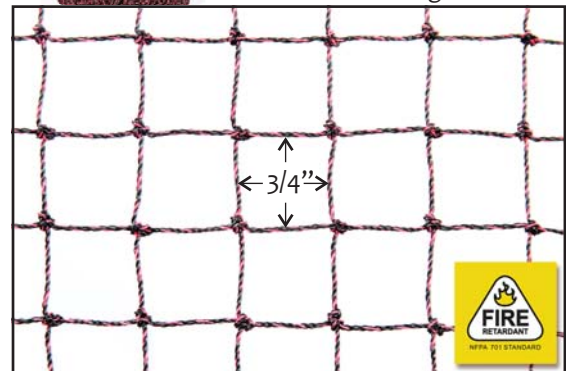

Gymnasium / Workspace Dividers

Debris & Object Barrier Netting

Heavy duty construction and durability make the Redbird Fire Retardant Bird Netting perfect for all types of exclusion projects especially in areas that require fire retardant products.

Redbird netting bundle

Fire Retardant Bird Netting that meets NFPA 701

Who is the NFPA?

The National Fire Protection Association (NFPA) is a global, non-profit organization that publishes consensus codes and standards intended to eliminate death, injury, property and economic loss due to fire, electrical and related hazards.

What is the NFPA 701 Standard?

NFPA 701 sets the standards for testing textiles and films for fire propagation. This test is not determining if the item is flame proof, but its resistance to ignition and flame propagation in specific conditions. Meeting the NFPA standards means that the item is compliant and can be classified as a flame retardant item or material.
