35”x 16” Economy Pigeon Trap

Simple and economical design. This easy to use and completely assembled repeating pigeon trap has 1 large one-way door with door baffles and a top mounted access door to remove birds. A shade screen (Item # SWS3516ES) is an available option. Built from 14 ga. galvanized wire with a 1" x 2" mesh this pigeon trap is designed to be economical, durable and portable. Trap comes fully assembled and ready to use.

Item# SW3516ES - Economy Pigeon Trap

Pre-bait the problem area for several days. Once birds are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the one way door so birds can move freely in and out of the trap as they eat. Apply bait in a trail that starts outside of the trap, leads in through the doors and ends with the bulk of the bait in the middle of the trap.

After acclimating to the trap, untie the door and capture the pigeons. Make sure to inspect the trap every day. Remove the pigeons by using the top access door.

Provide food and water in the trap. Partially cover the trap to create shelter from the elements. Do not leave birds in the trap for long periods of time.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
