

Live Capture Repeating Bird Traps

Pigeon Trap 36" x 24" x 9"

When assembled, the trap is 36"L x 24"W x 9"H. It weighs 9 lbs. and is made from 1" x 2" galvanized mesh and 14 gauge wire. It folds nearly flat for easy storage. This trap can hold 24 or more pigeons at a time. It includes a 36" x 24" sun shade screen to provide birds some shade from the sun. This trap has six trap doors and one large access door on top to remove birds. Use on a flat and level surfaces. Provide a small water source inside the trap along with the appropriate bait.

#SW3624KDS Collapsible Pigeon Trap

36"L x 24"W x 9"H
1" x 2" - 14 ga. wire
Includes 36" x 24" sun shade

Basic Trapping Guidelines

Pre-bait the problem area for several days before placing the trap. Position the trap down flat with the trap doors facing out to clear approaches. To acclimate the birds to the trap, wire the doors open and place feed on top and inside the trap. Once birds are acclimated to area and the trap, release the doors to capture

the birds. Inspect traps every day to remove trapped birds and to add bait and water as needed. If trapping in direct sunlight, use the sun shade to protect the captured birds from direct sunlight. Do not leave birds in the trap for long periods of time. Be sure to clean the trap between settings.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes planning, a knowledge of the target species, the correct bait, trap location and more.
