

## Live Capture Repeating Bird Traps

# Pigeon Trap 36" x 24" x 9"

This large pigeon trap measures 36"L x 24"W x 9"H. It weighs 9 lbs. and is made from 1" x 2" galvanized mesh and 14 gauge wire. It can hold 24 or more pigeons at a time. This trap has six one-way trap doors each with inner door guards on all 4 sides. There is one large access door on top to remove captured birds. Use on a flat and level surfaces. Provide a small water source inside the trap along with the appropriate bait. Use towel or board to provide shade.

### #SW3624 Large Pigeon Trap

36"L x 24"W x 9"H

1" x 2" - 14 ga. wire

Fully Assembled, Ready To Use

## Basic Trapping Guidelines

Pre-bait the problem area for several days before placing the trap. Position the trap down flat with the trap doors facing out to clear approaches. To acclimate the birds to the trap, wire the doors open and place feed on top and inside the trap. Once birds are acclimated to area and the trap, release the doors to capture

the birds. Inspect traps every day to remove trapped birds and to add bait and water as needed. If trapping in direct sunlight, use a towel (tied to the trap) or a simple board to provide shade for the trapped birds. Do not leave birds in the trap for long periods of time. Be sure to clean the trap between settings.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes planning, a knowledge of the target species, the correct bait, trap location and more.
