

Live Capture Snap Traps for Birds

Available in 17", 24" and 36" square sizes, these snap traps are designed for the live and humane capture of nuisance birds. The bird triggers the trap by depressing the feed pan which in turn sends the spring loaded bar (that has the capture netting attached) up and over the bird, quickly and securely enclosing it in the netting. Use the trap size that best matches your needs.

Item# SWST17 - 17" x 17" Snap Trap

Item# SWST24 - 24" x 24" Snap Trap

Item# SWST36 - 36" x 36" Snap Trap

Live Capture Snap Traps for birds can be placed on all types of flat surfaces. Place them on ledges, AC units, roofs or simply on the ground. You may need to secure the trap to the surface with ground stakes or simple ties.

Pre-bait the problem area for several days. Once birds are present, set the trap. Apply bait in and around the bait pan so the birds walk into the trap. Once triggered, the capture netting quickly closes over the birds and holds them securely.

Use the trap size best suited to bird species and trap location.

Remove birds immediately. DO NOT leave birds in traps for long periods of time. Do not leave the traps unattended for long periods of time. It is important to remove any trapped bird as soon as possible. We suggest using our #SW3516S cage trap with Shade Screen to transport birds to the release point.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
