

## Live Capture Repeating Bird Traps

# Medium Sparrow Trap 24" x 12" x 8"

Fully assembled and ready to use, this Repeating Medium Sparrow Trap can catch and hold 20 or more sparrow sized birds. It measures 24"L x 12"W x 8"H, weighs 4 pounds and is constructed of 1/2" x 1" - 16 gauge galvanized steel wire mesh. The inside end of the funnels have a 1.5" opening which can be made smaller by bending the wires inward at the end of the funnel. Use on a flat and level surface. Provide a small water source along with the bait used to draw the sparrows to the trap.

#TH501 - Medium Sparrow Trap

24"L x 12"W x 8"H  
1/2" x 1" - 16 ga. wire

## Basic Trapping Guidelines

Pre-bait the problem area for several days. Make sure that sparrows are eating the bait before placing the trap. Position down flat with the one-way funnel doors facing out to clear approaches. Acclimate the birds to the trap by placing the feed on top or next to the trap. Once birds are acclimated to area and the trap,

bait both approaches and inside the trap. Use the majority of the bait inside the trap.

Inspect traps every day to remove trapped birds and to add bait & water as needed. If trapping in direct sunlight, create shade by partially or fully covering the trap. Do not leave birds in the trap for long periods of time.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes planning, a knowledge of the target species, the correct bait, trap location and more.
