

## Live Capture Repeating Bird Traps

# Folding Pigeon Trap 36" x 16" x 8"

New and improved design with input from wildlife specialists. This trap collapses to just 1/2" thick for easy transporting or storage and can catch and hold 15 or more pigeons at a time. Assembled, the trap is 36"L x 16"W x 8"H, weighs 7 pounds and is constructed of 1" x 1" - 14 gauge galvanized steel wire mesh. Use on a flat and level surface. This trap has two one-way trap doors to allow pigeons to enter. Provide a small water source inside the trap along with the appropriate bait.

#TH502.5 - Pigeon Trap

Assembled:  
36"L x 16"W x 8"H  
1" x 1" - 14 ga. wire

Inclined panels  
at both ends help  
pigeons find their  
way into the trap

## Basic Trapping Guidelines

Pre-bait the problem area for several days before placing the trap. Position the trap down flat with the trap doors facing out to clear approaches. To acclimate the birds to the trap, wire the doors open and place feed on top and inside the trap. Once birds are acclimated to area and the trap, release the doors to capture

the birds. Inspect traps every day to remove trapped birds and to add bait and water as needed. If trapping in direct sunlight, you can create shade by partially or fully covering the trap with a weather resistant material. Do not leave birds in the trap for long periods of time. Be sure to clean the trap between settings.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes planning, a knowledge of the target species, the correct bait, trap location and more.
