

Live Capture Repeating Bird Traps

# Chicken Trap 42"x16"x20"

Fully assembled and ready to use, this Repeating Chicken Trap can catch multiple chickens per setting. It measures 42"L x 16"W x 20"H, weighs 18 pounds and is constructed of 1" x 2" - 14 gauge galvanized steel wire mesh. The unique trap door uses independent bobs which allow chickens to enter but prevents their exit. At the opposite end, it has an easy to use release door. Use on a flat and level surface. Provide a small water source along with the bait used to draw the birds to the trap.

#TH510R - Chicken Trap

42"L x 16"W x 20"H  
1" x 2" - 14 ga. wire

## Basic Trapping Guidelines

To successfully trap chickens, bait your target area for several days then introduce the trap over the bait area with both doors open and bait inside. The chickens will gain confidence and walk in and out of the trap. After a day or so of them entering the trap to feed, drop the doors in place to catch the chickens.

Inspect traps every day to remove trapped birds and to add bait & water as needed. If trapping in direct sunlight, you can create shade by partially or fully covering the trap. Do not leave birds in the trap for long periods of time. Be sure to clean your trap after use.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes planning, a knowledge of the target species, the correct bait, trap location and more.
