

## Live Capture Repeating Bird Traps

# Hawk Trap 36" x 36" x 42"\*

**IMPORTANT NOTE:** this trap is intended to trap hawk size birds of prey. We must receive proof of your current **Federal Migratory Bird Depredation Permit** before shipping this trap. *There are no exceptions!*

This hawk trap works by placing the bait in the lower section of the trap and setting the perch to hold the trap doors open. When a hawk lands on the perch to investigate the bait, the perch gives way under the weight of the hawk causing the trap doors to close above the bird. Made from heavy 1"x 2" - 12 ga. welded wire mesh and 2"x 2" angle iron framework. When deployed, the trap measures 36"L x 36"W x 42"H, weighs a total of 85 pounds and is shipped disassembled for lower freight costs. An instructional assembly video is available. With practice, the trap can be assembled or broken down for redeployment in just a matter of minutes.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes planning, a knowledge of the target species, the correct bait, trap location and more.
