

IGEBA®

UniPro5

ULV Fogger

Portable, 110VAC electric ULV cold fogger for fast and efficient fogging of small to large spaces for pest control, disinfection, plant protection, mold & fungus control, etc.

IGEBA UniPro5

Unit size and weight

- Dims (in): 23 x 22 x 46
- Dims (cm): 59 x 57 x 116
- Wt empty 131lbs / 56kg

Solution System

- Tank volume 5.2G / 20L
- Output (L/Hr) 10 - 18
- Output (G/Hr) 2.5 - 4.8

Electric Motor

- Sealed asynchronous, 110VAC / 60Hz / 18 amp*
- RPM: 2,845 rpm
- * Requires 20 amp plug/line

Compressor

- Flow 35ft³/min or 1M³/min
- Pressure 0.22 bar or 3 psi
- Speed 14000 rpm

Construction

- Welded galv steel frame
- Pnuematic Tires (2)

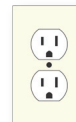

The IGEBA UniPro5 portable, electric ULV cold fogger does fast and efficient fogging work for a wide variety of applications and solutions.

UniPro5 uses a powerful, sealed electric motor, high speed compressor and 2 stage atomizing nozzle to produce fog particles 20 microns or less in size. This fine fog is ideal for getting into inaccessible spaces like wall voids, cracks, crevices, structural gaps, crawl spaces and around stored products.

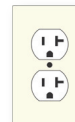

Designed to be portable, adaptable and durable. The fogger chassis is welded steel with 2 large pneumatic tires and an adjustable mast that raises and lowers the nozzle several feet. The nozzle swivels 360°.

Fog for pest control, disinfection, deodorizing, hydrating, public hygiene, plant protection and more. Note - before you fog any solution, check the product label to make sure that fogging is one of the approved methods of application.

The single-phase motor requires 60hz @ 110VAC with 18 amps of current at start up. Make sure you have a 20 amp line and outlet before you buy this equipment. **DO NOT** plug the UniPro 5 into a 15 amp outlet.

< 15 amp outlet. Do Not Use!

< 20 amp outlet looks like this. You must have a 20 amp service to run the UniPro5

ALWAYS read the product manual before use!
