

Blunt Tip Bird Control

Flat Tipped, Stainless Steel Bird Spikes From Nixalite®
A Name You Know, Products You Trust

Sometimes..
being 'blunt'
is a good thing.

Nixalite's **Blunt Tip** wire option puts a flat tip at the ends of the stainless steel wires.

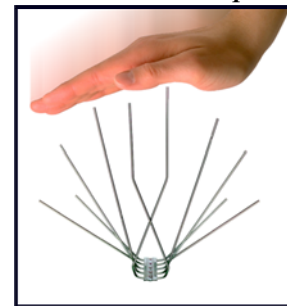

Use Blunt Tip where human contact is the primary concern. For all other applications, use the original pointed wire designs.

Use the Blunt Tip option only for installations where frequent human contact is possible AND where there are just a few pest birds present. For all other applications, use the standard pointed tip wires, especially where pest birds are numerous or when installing a climbing animal barrier.

Blunt Tip is available on Nixalite's All American Made, All Stainless Steel Bird Spike Family, including the Premium Nixalite Models S and H, all E-Spike Eco-Spike Models and the Pigeon Spike Stainless deterrent spikes.

While Blunt Tip is a no-cost option, additional delivery time may be required. Contact your Nixalite Bird Control Professional for more details on the Blunt Tip option.
