

COPPER **Blocker**™ PEST STOPPER

CopperBlocker Pest Stopper is a soft copper mesh that packs tightly into gaps, cracks and openings to keep out unwanted pest birds, bats, rodents and insects.

It is easy-to-install, will not rust and outlasts steel wool and expanding foams. To install as an access barrier, simply cut the desired length from the roll and pack, push or stuff CopperBlocker into cracks, gaps and openings. It packs tightly and resists being pulled out by pests. CopperBlocker is available in 100 ft. rolls.

Access control installations are a process of elimination. Careful inspection should reveal any openings or gaps missed the first time.

CopperBlocker Pest Stopper for Snail & Slug Control

Protects plants vulnerable to slug and snail damage. CopperBlocker can be installed much like a miniature fence, held in place with wooden or plastic dowels for posts. When the natural secretions of a snail or slug contacts the copper mesh it produces a small electrical current that the snails and slugs can't stand.

CopperBlocker Pest Stopper

- 100% Soft Copper Mesh
- Versatile Access Control
- Superior To Steel Wool
- Outlasts Expanding Foam
