

# The Cyclone

A precision ULV electric cold fogger that dispenses both water and oil based solutions accurately and efficiently.

There's no guesswork when using the **Cyclone** ULV cold fogger. It can apply both water and oil based solutions accurately and efficiently. The Cyclones' ultra-precision metering valve assures particle size less than 20 microns regardless of flow rate and viscosity of the solution.

This makes the **Cyclone** ideal for precise application of disinfectants, deodorants, pesticides, fungicides, duct sealants, and more. Use the Cyclone in a variety of indoor and outdoor applications, such as hospitals, schools, homes, hotels, resorts, greenhouses, food processing plants, warehouses, dairy and poultry farms and horse stables.

Included with the Cyclone, you will get the **Curtis Viscometer** which is used to measure the viscosity of your formulation. The viscosity measurement is then matched to a chart provided in the manual to give precise control valve settings for particle size and formulation output, assuring less waste of chemical and proper compliance with label requirements.

#### **The Cyclone ULV:**

**Cyclone** (standard)

Contact Nixalite for more information on additional Cyclone models and accessories.

**Input power:** (above model)

110/120 volt AC, 6.5 amps, 50/60 Hz

#### **Cyclone Specs:**

**Adjustable flow rates:** 0 - 2.4 oz/min

**Particle size:** 5 - 20 microns

**Formulation tank:** 1 gal

**Machine size:** 18"L x 8"W x 15"H

**Machine weight** (empty): 15 lbs

**Machine weight** (full): 25 lbs
