Nixalite® Gutter Strap Worksheet

Nixalite requires the following dimensions to manufacture Gutter Straps. This worksheet shows where to measure. Record the dimensions in the box provided below.

The dimensions you provide must be accurate. Custom made forms are non-returnable and non-refundable items.

Provide dimensions for the following:

A - What is the dimension from the outside edge of the gutter to the fascia board?
B - How much clearance is there between the roof overhang and the top of the gutter?
C - How far does the roof overhang the gutter?
D - Overall length of the gutter. If there is more than one gutter, list each length on line D.
E - Select the type of control do you intend to use: Nixalite Premium or E-Spike Economy.

Please fill in the requested dimensions below. Please be accurate. Do not estimate dimensions from the ground! We make your gutter straps to fit the dimensions you provide.

Record your dimensions below

A
B
C
D

What type of control

☐ Nixalite Premium Bird Barriers
☐ E-Spike Economy Bird Spikes

If you have any questions or are not sure about which dimensions to record, please contact Nixalite. A representative will be happy to assist you with your gutter straps.

Example drawing: typical gutter
If your gutter/fascia arrangement looks nothing like the example, contact Nixalite for direction.

If you have any questions or are not sure about which dimensions to record, please contact Nixalite. A representative will be happy to assist you with your gutter straps.

NOTE: Nixalite determines the proper strip spacing and quantities for all custom made installation forms. We will not manufacture a form to mount incorrect spike strip quantities or spacing.

When you have completed this worksheet, please fax or mail it back to Nixalite. We will provide you with the pricing and estimated delivery time for your custom made gutter strap. If you have any questions, contact Nixalite.
