

The Hurricane

An easy to use electric cold fogger that dispenses both water and oil based formulations effectively and efficiently.

Nixalite offers the **Standard Hurricane**, the **Hurricane FLT** (with float valve installed) and the custom **Hurricane 020**, used to apply the Fog Force bird repellent.

The **Standard Hurricane ULV** (ultra-low volume) dispenses both oil and water based disinfectants, deodorizers, germicides and insecticides. It is used safely and efficiently in hospitals, restaurants warehouses nursing homes, schools, greenhouses and other institutions. With an adjustable output of 0-5 gallons per hour, the standard Hurricane can handle small to medium sized areas on its own or larger areas with auxiliary fans. Can be used wherever cold fog - aerosol particle chemical treatment is needed.

The **Hurricane FLT** (with the float valve installed) is a standard Hurricane with a Float Valve tank installed. With the Float Valve option, several units can be hooked together with hoses to a single water and/or chemical supply source.

Hurricane 020's are purpose built to apply the **Fog Force Bird Repellent**. They work best when used in small to medium size enclosed areas. Combine units for larger areas or use the pulse-jet thermal foggers available from Nixalite.

The Hurricane Models:

Hurricane - Standard Hurricane Model

Hurricane FLT - Hurricane with float valve

Hurricane 020 - Custom Hurricane for applying Fog Force Bird Repellent

Input power (all above models):

110/120 volt AC, 6.5 amps, 50/60 Hz

Hurricane ULV Specs:

Adjustable flow rates: 0 - 5 gal/hr

Particle size: 5 - 50 microns

Formulation tank: 1 gal

Machine size: 13"L x 8"W x 14"H

Machine weight (empty): 7 lbs

Machine weight (full): 17 lbs
