

# The Tornado

A multi-range electric cold fogger that dispenses water and oil based solutions in heavy mists or in ULV particle sizes.

With a variable rate, precision control metering valve, a 3 gallon formulation tank and a 2-stage blower, the **Tornado** is one of the most versatile electric cold fog machines available.

The Tornado applies both water and oil based solutions accurately and efficiently indoors and outdoors. It is ideal for the application many different solutions such as, repellents, disinfectants, deodorants, pesticides, fungicides, duct sealants, and more. Use the Tornado in and around hospitals, schools, homes, hotels, resorts, greenhouses, food processing plants, warehouses, dairy and poultry farms and horse stables.

Included with the Tornado, you will get the **Curtis Viscometer** which is used to measure the viscosity of your formulation. The viscosity measurement is then matched to a chart provided in the manual to give precise control valve settings for particle size and formulation output, assuring less waste of chemical and proper compliance with label requirements.

## **The Tornado ULV:**

Tornado (standard)

Call for more information on additional models and accessories for the Tornado cold fogger.

## **Input power:**

110/120 volt AC, 6.5 amps, 50/60 Hz

## **Tornado Specs:**

**Adjustable flow rates:** 0 - 5 gal/hr

**Particle size:** 5 - 40 microns

**Formulation tank:** 3 gal

**Machine size:** 20"L x 26"W x 26"H

**Machine weight (empty):** 20 lbs

**Machine weight (full):** 50 lbs
