# Nixalite of America Inc. Offers Tips on Spring Pest Control

PRESS RELEASE - MAR 22, 2016 15:38 CDT

Nixalite of America Inc., the leading manufacturer of bird control products for 66 years, gives tips on how to prepare for spring pests.

As warmer weather approaches, you'll notice more pests in and around your home or office. This is why it is important to prepare your home or office against these pests as soon as you can.

The following tips will assist you in keeping your home or office pest-free through the upcoming spring and summer months.

- **Remove Standing Water**

Many different pests including [mosquitoes](#) congregate and breed in standing water, even very small puddles. This makes it very important to remove any standing water and to fix any leaks in, out, and around your home or office before warmer weather arrives.

- **Clean Up the Inside and Outside of Your Home or Office**

As snow melts away, it's important to clean up leftover leaves and branches from your yard. These tend to attract ticks and stinging insects if left alone. It's also important to keep all food sources such as bird seed, trash, and garden vegetables as far away from the exterior of your home or office as possible.

- **Build A Line of Defense Around Your Home**

Applying repellents around the perimeter of your home or yard gives you an extra line of defense against unwanted pests and rodents. Nixalite's line of [pest repellents](#) assists in repelling birds, rodents, and many different insects.

- **Keep Your Home or Office Sealed**

Rodents and pests can access the inside of your home or office through even the smallest cracks or crevices. It's important to keep these points of entry [properly blocked](#) so there are no chances for entry.

- **Make Your Home or Office Inhabitable for Returning Birds**

As birds return from their warm winter vacations, they're going to be looking for a place to build their nest. Don't let your home or office be a bird's new home by using various [bird control](#) methods (bird spikes, bird netting, bird traps, etc.).

Nixalite is the leading manufacturer of effective and humane pest bird and wildlife control products. Established in 1950, Nixalite is a third generation family owned firm with over 150 years of combined experience.
